Assignment 5

Q.1

| Group of people | Doloperidol | | |
|-----------------|-------------|----|----|
| | X | Y | Z |
| A | 25 | 7 | 13 |
| | 27 | 8 | 18 |
| B | 21 | 16 | 19 |
| | 24 | 11 | 14 |
| C | 29 | 19 | 30 |
| | 31 | 21 | 27 |

$$\begin{aligned}
 \text{(1) Correction factor} &= \frac{(T)^2}{n} \\
 &= \frac{(360)^2}{18} \\
 &= 7200
 \end{aligned}$$

$$\begin{aligned}
 \text{(2) Sum of squared total (SST)} &= \sum x_{ij}^2 - \text{Correction factor} \\
 &= 8144 - 7200 \\
 &= 944
 \end{aligned}$$

$$\begin{aligned}
 \text{(3) Sum of squared between column (SSBc)} &= \frac{\sum x_{ij}^2}{n_j} - \text{correction factor}
 \end{aligned}$$

$$\begin{aligned}
 &= \left[\frac{157 \times 157}{6} + \frac{82 \times 82}{6} + \frac{121 \times 121}{6} \right] - 7200 \\
 &= 469
 \end{aligned}$$

$$\textcircled{3} \text{ Sum of squared between Rows (SSB}_r\text{)} \\ = \frac{(\sum x_{i.})^2}{n_i} - \text{correction factor}$$

$$= \left[\frac{98 \times 98}{6} + \frac{105 \times 105}{6} + \frac{157 \times 157}{6} \right] - 7700$$

$$= 346.33$$

$$\textcircled{4} \text{ Sum of squared within (SSW)}$$

$$= \sum (x_{ij} - \bar{x})^2 + \sum (x_{ij} - \bar{x}_i)^2$$

$$= [(25-26)^2 + (27-26)^2 + (2.5-7)^2 + (7.5-8)^2 \\ + (15.5-13)^2 + (15.5-18)^2 + (21.5-21)^2 + (22.5-24)^2 \\ + (13.5-16)^2 + (13.5-11)^2 + (16.5-19)^2 + (16.5-14)^2 + \\ (30-29)^2 + (30-31)^2 + (20-19)^2 + (20-21)^2 + (30-28.5)^2 \\ + (27-28.5)^2]$$

$$= 53$$

$$\textcircled{5} \text{ Sum of squared interaction (SSI)}$$

$$= SST - [SSB_c + SSB_r + SSW]$$

$$= 944 - [469 + 346.33 + 53]$$

$$= 75.67$$

DOF :-

$$SSB_c : (c-1) = 2$$

$$SSB_r : (r-1) = 2$$

$$SSI : (n-1) = 17$$

~~SSW~~

$$SST = (n-1) = 17$$

$$SSI = SSB_c + SSB_r = 4$$

$$\begin{aligned} SSW &= SST - (SSB_c + SSB_r + SSI) \\ &= 17 - (2 + 2 + 4) \\ &= 9 \end{aligned}$$

| Source | SS | DOF | MS | Fs Ratio | |
|-------------|--------|-----|--------|----------|-----------------|
| B/w col | 469 | 2 | 234.5 | 39.88 | $F(2,9) = 4.26$ |
| B/w row | 346.33 | 2 | 173.16 | 29.45 | $F(2,9) = 4.26$ |
| Interaction | 75.67 | 4 | 18.92 | 3.22 | $F(4,9) = 3.63$ |
| within | 53 | 9 | 5.88 | | |
| Total | 944 | 17 | | | |

As for 1st & 2nd part is rejected while 3rd is accepted.

Hence we conclude

- 1) Yes, the balapiridal types X, Y, Z are differently in reducing schizophrenia.
- 2) Yes, group A B C are affected differently by treatments.
- 3) No, there is no significant info (interaction) between groups & types.

Q1. Kruskal wallis test is a non-parametric statistical test used to determine if there are statistically significant diff between 3 or more independent groups. The test works by ranking the data from all groups together and then analyzing the rank sums.

This test is appropriate when:-

- (1) The data does not meet the assumption of normality
- (2) The data is ordinal but does not meet parametric test assumption.
- (3) There are 3 or more independent groups being compared.

| Enhancer Results | | | Ranks | | |
|------------------|----|----|-------|------|------|
| 14 | 20 | 24 | 1 | 7.5 | 13 |
| 15 | 20 | 25 | 2 | 7.5 | 14.5 |
| 16 | 21 | 25 | 3 | 9.5 | 14.5 |
| 17 | 21 | | 4 | 9.5 | |
| 18 | 22 | | 5.5 | 11.5 | |
| 18 | 22 | | 5.5 | 11.5 | |

Name of the enhancer associated with

| | | |
|---|---|---|
| B | A | C |
| B | C | A |
| B | A | C |
| B | C | |
| B | A | |
| A | C | |

Finding sum of the Ranks

| A | Rank | B | Rank | C | Rank |
|----|------|----|------|----|------|
| 18 | 5.5 | 14 | 1 | 20 | 7.5 |
| 20 | 2.5 | 15 | 2 | 21 | 9.5 |
| 21 | 9.5 | 16 | 3 | 22 | 11.5 |
| 22 | 11.5 | 17 | 4 | 24 | 13 |
| 25 | 14.5 | 18 | 5.5 | 25 | 14.5 |
| 5 | 48.5 | 5 | 15.5 | 5 | 56 |

Kruskal Wallis Test statistic

$$H = \frac{12}{n(n+1)} \sum_{i=1}^k \frac{R_i^2}{n_i} - 3(n+1)$$

$$H = \frac{12}{15(16)} \left[\frac{(48.5)^2}{5} + \frac{(15.5)^2}{5} + \frac{(56)^2}{5} \right] - 3(16)$$

$$H = 9.285$$

$$\text{DOF} = (k-1) = 3-1 = 2$$

$$\alpha = 5\%$$

$$\therefore \alpha_{\chi^2} = 0.05 = 5.991$$

c) Null Hypothesis (H_0) : There is no statistically significant difference in the plant height between the three enhancers.

Alternate hypothesis (H_1) : There is a statistically significant difference in the plant heights between the three enhancers.

d) As $H > \alpha$, H_0 is rejected and we conclude that there is a statistically significant difference in the plant heights between the three enhancers.

They have significantly different impacts on the plant species given.
